SUMMARY

Computer Science student (graduating July 2027) with three software development internships and a strong base in data structures and algorithms, OOP, DBMS and SQL. Experienced in building full-stack applications with React.js, REST APIs, JWT authentication and PostgreSQL across the full software development life cycle. A self-starter with good problem-solving and communication skills, seeking a Software Engineer Intern role to write clean, testable and efficient code and learn new technologies quickly.

EDUCATION

B.E. in Computer Science, Dr. D.Y. Patil Technical Campus, Pune Sep 2023 - Jul 2027

CGPA: 8.50/10

Coursework: Data Structures & Algorithms, Operating Systems, DBMS, Object-Oriented Programming, Software Engineering

SKILLS

Programming Languages: Java, Python, JavaScript (ES6+), SQL

Core Computer Science: Data Structures & Algorithms, Problem Solving, Object-Oriented Programming (OOP), Operating Systems, DBMS, Debugging

Backend & APIs: REST APIs, Django REST Framework, FastAPI, JWT Authentication

Databases: PostgreSQL, MySQL, SQL Queries

Frontend / Full-Stack: React.js, JavaScript, HTML5, CSS3, Tailwind CSS

Tools & Practices: Git, GitHub, Jira, Agile/Scrum, SDLC, Code Reviews, Testing & Debugging

EXPERIENCE

Full-Stack Developer Intern | JMD Solutions & Beyond, Pune Apr 2026 - Sep 2026

- Contributed to all phases of the software development life cycle for an ERP system and a billing system (invoicing and payment tracking), working across frontend and backend.
- Developed JMD Nest, a PG accommodation platform, using React.js and Tailwind CSS, integrated with backend services and REST APIs.
- Built the company website in React.js with reusable service-grid components and a contact form.
- Followed Git-based workflows, code reviews and clean, efficient coding practices across all projects.

Frontend Developer Intern (Part-Time, Remote) Jan 2025 - Feb 2025

- Built responsive web pages in React.js and JavaScript, integrating REST APIs, in Agile sprints.
- Converted design prototypes into reusable UI components, collaborating with backend developers and designers.
- Used Git, GitHub pull requests and Jira for version control, sprint tracking and bug fixes.

AI Intern (Part-Time, Remote) | Microsoft Foundation Apr 2025 - May 2025

- Developed applications using Azure AI Services; took part in weekly code reviews and Agile ceremonies.

PROJECTS

SafeRoute AI | *Python, Django REST Framework, React.js, REST APIs*

- Built a disaster supply routing system with a React.js frontend consuming REST APIs from a Django backend.
- Developed and delivered the application as a complete hackathon submission, working under tight deadlines.

eLabAssist (Diagnostic Lab Management System) | *React.js, JWT Authentication, PostgreSQL, SQL*

- Built a React patient portal for a full-stack lab management system with JWT authentication and a PostgreSQL database.
- Wrote formal technical documentation for the authentication module.

Kanban Board (Jira-style) | *React.js, Tailwind CSS, JavaScript*

- Built a Jira-like task board with reusable React components, drag-and-drop columns and state management.

LEADERSHIP

Core Technical Member, Developer Student Club (DSC), DYPTC: Led web development projects and conducted peer learning sessions, strengthening teamwork and communication skills.
